Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 and 3-12, drawn to a method for plastid transformation comprising introducing into the plastid two nucleic constructs and replicating the plant cell on a medium containing a plastid non-lethal compound, classified in class 800, subclass 278, for example.
- II. Claims 1-2, drawn to a method for plastid transformation comprising introducing into the plastid two nucleic constructs, replicating the plant cell on a medium containing a plastid non-lethal compound, and producing a plant containing only one of the constructs, classified in class 800, subclass 288, for example.
- III. Claims 13-22, drawn to a method for plastid transformation comprising introducing into the plastid a single nucleic acid construct and replicating the plant cell on a medium containing a sublethal amount of a plastid lethal compound, classified in class 800, subclass 288, for example.

Claim 1 will be examined to the extent it reads on the elected invention.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation. The different methods have different starting materials, different method steps and different end products.

Art Unit: 1638

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, fields of search, and classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
